

### **Permissive Footpaths in Hilland Wood (From junction of Hurland Lane and Gentles Lane to BW508)**

There are finger posts near to the 5-bar gate pointing to two permissive paths (Pics 1 &2) – both lead to BW508.

The **left-hand path** passes directly through the coppice to meet BW508 opposite a tree with a distinctive hole in it (Pic 3). There is no reverse finger post at this end.

The **right-hand path** follows the direction of Gentles Lane, passing another 5-bar gate (Pic 4) before turning into the woodland to meet BW508 at the 'muddy patch' (Pic 5). There is no reverse finger post at this end.

**Note:** The right-hand path is a useful route to access the National Trust path through Gentles Copse from here without walking down the road.
